

Environmental policy

M&TM Freight aims to provide all work in an innovative, reliable environmentally friendly and cost-effective care.

This provides a concrete contribution to the viability of society.

The environmental policy applies to all activities and business processes within and outside M&TM Freight, which has an effect on the environment. The environmental policy of M&TM Freight is based primarily on the prevention and reduction of all effects that have an adverse effect on the environment. The people of M&TM Freight are aware that managing the environmental aspects within M&TM Freight is a responsibility of the whole enterprise.

M&TM Freight is committed in order to control the environmental impact and where possible avoid the following policy provisions to meet:

- respecting the environmental rules and regulations
- assessment based on new insights and periodically setting environmental objectives in order to continually improve environmental performance

Environmental:

Reduce the internal environment caused by the use of an environmental management system in accordance with generally accepted guidelines in the field of sustainable management.

- Adjustment based on the continuous measurement of all kinds of emissions. (fuel, electricity and water)
- Environmental objectives are reviewed annually and adjusted.
- With the purchase of vehicles will include environmental criteria in the consideration of product selection.
- Promoting intermodal transport (via barges)
- Eco driving course for our drivers
- Use of mostly digital documents
- Electronic invoicing
- Promoting the use of public transport.
